Transportation system / UI rough draft

01 / MAIN PAGE — BEFORE RESTOCK

Transportation System

Stock and store demand

2 warehouses · 2 stores · 2 item types

Warehouse inventory

Warehouse	Keyboards	Monitors
Warehouse A	5	2
Warehouse B	4	3

Store demand — units missing

Store	Keyboards	Monitors
Store X	3	1
Store Y	4	2

Update quantities

Location: Warehouse A

Item: Keyboards

Operation: Add units

Quantity: 0

Save quantity

Choose a warehouse for stock or a store for demand. Add units or set the total. Use whole numbers of 0 or more.

Shipping cost per unit ($)

From / to	Store X	Store Y
Warehouse A	2.00	5.00
Warehouse B	4.00	1.00

Same rate for every item type. Edit cells, then save costs.

Save shipping costs | Preview restock

Unfilled store demand stays saved for the next restock, including after reopening the app.

02 / AFTER CLICKING RESTOCK

Transportation System

Restock preview

All store demand can be met. Review the shipments below.

10 units to ship · Total shipping cost: $14.00

Proposed shipments

Item	From → to	Units	$/unit	Subtotal
Keyboards	A → X	3	2.00	6.00
Keyboards	B → Y	4	1.00	4.00
Monitors	A → X	1	2.00	2.00
Monitors	B → Y	2	1.00	2.00

Warehouse stock after confirmation

Warehouse	Keyboards	Monitors
Warehouse A	2	1
Warehouse B	0	1

All store demand will be 0. Four units remain in warehouses.

Apply this restock?

Confirm to deduct only shipped units from stock and store demand. Any unfilled demand remains saved.

Confirm restock | Cancel

Cancel without changing stock or demand.

03 / AFTER CONFIRMING

Transportation System

Restock applied. All 10 requested units have been allocated.

Shipping cost: $14.00

This updates the project records; it does not book a real delivery.

Updated warehouse inventory

Warehouse	Keyboards	Monitors
Warehouse A	2	1
Warehouse B	0	1

Updated store demand

Store	Keyboards	Monitors
Store X	0	0
Store Y	0	0

Back to inventory

No items need restocking. Add store demand to create another plan.

04 / ALTERNATE PREVIEW — NOT ENOUGH STOCK

Transportation System

Partial restock preview

12 of 14 needed units can ship now. The remaining 2 monitors will stay in store demand.

Example change: Store Y now needs 6 monitors instead of 2.

Availability by item

Item	Available	Needed	Unfilled
Keyboards	9	7	0
Monitors	5	7	2

12 units to ship · Minimum shipping cost: $20.00

Ship the maximum possible quantity, then minimize its cost. Review the plan below; nothing changes until you approve.

Proposed shipments

Item	From → to	Units	$/unit	Subtotal
Keyboards	A → X	3	2.00	6.00
Keyboards	B → Y	4	1.00	4.00
Monitors	A → X	1	2.00	2.00
Monitors	B → Y	3	1.00	3.00
Monitors	A → Y	1	5.00	5.00

After approval: Store X has no unmet demand. Store Y still needs 2 monitors. Warehouse A keeps 2 keyboards; both warehouses have 0 monitors.

Approve available shipments?

Deduct only the shipped quantities. Save Store Y's remaining 2 monitors as outstanding demand for the next restock.

Approve partial restock | Cancel

Cancel leaves stock and demand unchanged.

05 / AFTER APPROVING PARTIAL RESTOCK

Transportation System

Partial restock applied. 12 units allocated; 2 monitors still outstanding.

Shipping cost: $20.00

This updates the project records; it does not book a real delivery.

Updated warehouse inventory

Warehouse	Keyboards	Monitors
Warehouse A	2	0
Warehouse B	0	0

Remaining store demand — saved

Store	Keyboards	Monitors
Store X	0	0
Store Y	0	2

Back to inventory

Outstanding: Store Y needs 2 monitors. This demand stays saved across sessions until fulfilled or explicitly edited. Add warehouse stock, then preview restock again.

Next visit: show "2 units outstanding" above store demand. Recalculate using current stock and prices; require approval again. If no needed stock is available, keep the demand and show "Nothing available to ship."
